Upcycle your old t-shirts into reusable and renewable cloth bags—no sewing needed! Your generous donation of t-shirts, time, and effort means so much to so many organizations in our community. These reusable bags allow agencies to provide additional services and resources that meet not only the immediate needs of their clients, but also of the community and environment at large.

The T-Shirt Bag project will involve creating reusable and renewable bags by transforming old t-shirts. These will be provided to individuals experiencing homelessness, clients visiting food pantries and resource centers, and individuals and families living in temporary shelters.

DID YOU KNOW…

- 100 billion plastic bags are used every year—that’s 300 plastic bags per person!
- An average of 6,000 pounds of plastic bags wash up on every major shoreline each year.
- Plastic bags take 1,000 years to biodegrade.
